Skills

Languages: C++, C, JavaScript, SQL
Frontend: HTML, CSS, React.js, Tailwind CSS, React Router
Backend: Node.js, Express.js, REST APIs, Socket.IO, WebRTC, JWT Authentication
Databases: MongoDB, SQL
Tools & Platforms: Git, GitHub, k6, Postman, Render, Vercel

Experience

Samyora Private Limited Jun 2026 – Present
Full Stack Developer Intern *Remote*

- Engineered k6 load testing workflows for NexPlay, an esports SaaS platform, simulating up to 1000 concurrent users across 25+ REST APIs and analyzing p50/p95/p99 latency, throughput, and error rates.
- Identified scalability bottlenecks including database connection pool exhaustion, rate limiting issues, and missing migrations causing API failures; documented findings with performance reports and debugging logs.

Projects

Talky – Real-Time Video Calling Platform | *MERN Stack, WebRTC, Socket.io* | GitHub | Live

- Built a MERN-based peer-to-peer video conferencing platform using WebRTC for direct media streaming and Socket.IO for signaling and room coordination.
- Implemented SDP offer/answer negotiation, ICE candidate exchange, and STUN-based NAT traversal to establish real-time peer connections.
- Developed media controls including camera, microphone, screen sharing, pre-join preview, meeting history, and dynamic participant rendering using React Hooks and WebRTC APIs.

ConvoGPT – AI-Powered Chat Application | *MERN Stack, OpenAI API* | GitHub

- Built an AI-powered chat application using the MERN stack and OpenAI's GPT-4o-mini model, supporting multi-thread conversations with UUID-based thread management.
- Architected a modular backend using controllers, models, routes, and utility services, enabling scalable chat and thread management through RESTful APIs.
- Implemented React Context API for global state management and integrated ReactMarkdown, rehype-highlight, and a real-time typing animation to deliver an interactive chat experience.

Pocket – Personal Expense Tracker | *MERN Stack* | GitHub | Live

- Developed a full-stack personal finance application enabling users to manage income, categorize expenses, track savings, and visualize financial insights.
- Built secure RESTful APIs with JWT authentication and complete CRUD functionality for income and expense management.
- Integrated Multer and Cloudinary for profile image uploads, storing image URLs in MongoDB, and designed interactive financial dashboards using Chart.js for expense visualization.

Achievements

- **Computer Science Topper – CBSE Class XII:** Secured 99/100 in Computer Science, highest score in school.
- **DSA:** Solved 350+ DSA problems across LeetCode, GeeksForGeeks, and HackerRank.

Education

International Institute of Information Technology, Bhubaneswar 2024 – Present
B.Tech in Computer Science and Engineering *CGPA: 8.89 (till 4th Semester)*

Delhi Public School Kalinga 2024
Class XII (CBSE) – PCM CS *94.8%*

Delhi Public School Kalinga 2022
Class X (CBSE) *97%*
